

Using VOK-SAFE for the protection of people and property

Officers operating in close protection.

EVENT SECURITY

▶ Event admission and access control assignments, security patrols, personal safety, theft or malicious damage prevention, event security, etc. are the type of assignments dealt with by security agencies on a daily basis.

During the organization of big events, large industrial companies want to ensure the smooth-running of the event in which they have invested heavily. This is successfully achieved when **special attention is given to the safety of those taking part.**

It consists of putting commissionaires or those with face recognition abilities at entrances in order to screen access, and putting stationary or mobile security guards inside the premises to regulate any excessive behaviour.

These teams owe the successful fulfilment of each assignment to **the ability for communication at any given moment** in order to ensure that a considered and appropriate response to every situation can be given **immediately and as discreetly as possible.**

▶ VOK-SAFE is the solution to this problem. This wireless communication system, which has already been endorsed by several elite units, enables **continuous communication** between team members, thereby ensuring **intervention procedures are swiftly and discreetly coordinated.**

THE ADVANTAGES OF THE VOK-SAFE SYSTEM

- ▶ It is a **totally hands-free system** giving users complete freedom of movement in the event intervention is required.
- ▶ It is a **small, light-weight device** with a large range of headsets and intra-auricular headsets for **discreet communication.**
- ▶ It has a **patented noise filter** guaranteeing clear communication even in noisy environments (demonstrations, concerts, etc.).
- ▶ It operates on a different band of frequencies from those of walkie-talkies, ensuring that there is **no interference in communications.**
- ▶ It has an **optimal level of confidentiality** thanks to a state-of-the-art encryption system. No system can penetrate the network and eavesdrop.
- ▶ **No fixed installation is required,** making it easy and ready to use in any location.

VOK-SAFE

Wireless communication systems for emergency service professionals and private individuals

TECHNICAL DETAILS

Number of users	2 to 6 in full duplex mode + an unlimited number in listening mode
Range	Up to 800m (1/2 mile)
Channels	3 (in Europe) - FHSS (US, Canada)
Battery life	Up to 14 hours
Battery	Rechargeable Li-Polymer 3.7V 1000 mAh
Frequencies	863-870MHz (Europe, South Africa...)
.....	902-928 MHz (USA, Canada, Australia...)
Power	10/200mW
Weight	150g - 5.3 oz (battery included)
Dimensions	120 x 60 x 25mm (4.7" x 2.4" x 0.8")
T° range	-10/+50°C (14/122°F)
Modulation	GFSK
Sensitivity	-103dBm
Technology.....	TDMA
Norms	Europe: EN 300-220 / EN 301-357
.....	USA: FCC Part 15
.....	AS/NZS 4268

PRODUCTS & ACCESSORIES

Conference system

VOKKER Audio transceiver

Headsets

- KEN 010** Generic headset
- KEN 020** Generic headset with On/Off switch
- KEN 030** Generic headset with lap microphone
- SEN 010** In-ear headset

Chargers, batteries & push-to-talk

- PTT 010** Push-to-talk button
- BCH 030** 3 slots charger

Packaging & Accessories

- HAC 026** Rigid protective case
- SOC 010** Flexible & reinforced transport bag
- HAR 010** Harness
- ABD 010** Armband
- BEL 010** Belt
- BEC 010** Belt clip
