PELTOR™

Work never  
**sounded**  
this good

Peltor™ WS WorkStyle

With the new  
**Peltor™ WS WorkStyle**  
it's easy to control what you hear  
— and don't hear

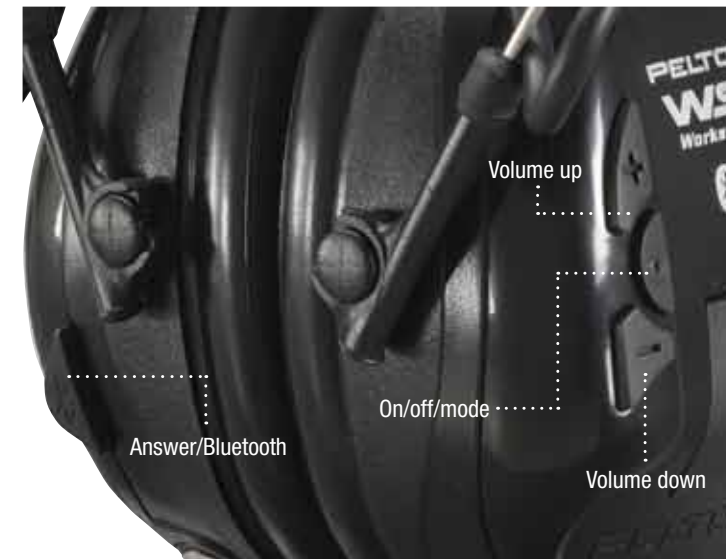

**Listen** wirelessly to your podcasts or favourite music with stereo Bluetooth. If a call comes in the music switches off, and when you end the call it carries on automatically from where it left off. A patented new loudspeaker solution produces dynamic, well-balanced stereo sound.

And you can talk on the phone or listen to music even if you're working in a noisy environment. The protector cup muffles a full 26 dB (SNR) and the built-in microphone distinguishes speech from noise. Each cup also has a surround microphone that captures external sound. The sound is analysed at ultra-high speed before it reaches your ear. Speech is amplified while noise, including sudden loud noises, is filtered out. You yourself set the volume levels for surround sound, music and mobile phone calls.

With Peltor™ WS WorkStyle you can easily tailor your sound experience. While effectively protecting your hearing.

## User's guide:

- 1 On and off.** Hold the On/off/mode button down for two seconds.
- 2 Bluetooth.** Peltor™ WS WorkStyle can be connected to **Bluetooth** which supports A2DP, HFP and HSP. From the off position, hold the On/off/mode button down for five seconds until a voice says "Pairing mode". Activate **Bluetooth** on your mobile and find the new device. Select "Peltor™ WS5" from the display. If your phone asks for a password, enter "0000". A voice will say "Pairing complete".
- 3 Talking on your mobile.**
  - An incoming call is indicated by a ring signal in the Peltor™ WS WorkStyle. Answer by briefly pressing the Bluetooth button.
  - Reject an incoming call by holding the Bluetooth button down.
  - Activate voice control by briefly pressing the Bluetooth button.
  - Call back by holding the Bluetooth button down for two seconds.
- 4 Setting the surround sound volume.** Hold the (+) or (-) button down.

- 5 Setting the call volume.** Hold the (+) or (-) button down. Briefly press the On/off/mode button and then the (+) or (-) button to adjust the surround sound volume while a call is in progress.
- 6 Adjusting the volume of streamed music.** Hold the (+) or (-) button down to raise or lower the volume. Briefly press the On/off/mode button and then the (+) or (-) button to adjust the surround sound volume while music is being streamed.
